Indian Institute of Hotel Management

Why is a Placement Cell So Important in a professional college?

While there are so many opportunities lying across the country, ranging from corporates to hospitality establishments and reputed catering units, the job-hunting process is manifold. However, in reality, there is a stringent competition in the job market to match the talent availability with the job profile. This is where placement cell bridges the gap, easing the procedure of recruitment to be simpler for companies and at the same time beneficial for the students. With the proper placement and training, students learn how to put forth their knowledge and abilities in the right way to fetch the best of jobs. Yet, it takes the right qualifications and effort to put in beforehand and afterward to sustain and grow in the career space.

The primary objective of the college placement cell is to place all eligible students in reputed companies, right at the campus itself. Placement cells help identify the knowledge, skills and attitude matrices of the students coming from all walks of lives and create job profiles for each of them to get them placed in relevant profiles with reputed companies. The placement cells recognize the areas of training and methods with respect to the requirements of the industry and thus formulate a sequence of training activities to meet the requirements for campus placement.

Role of our placement cell :

We have conceptualised the course in such a manner so that we can assist the students with a suitable job after completion of the course. The courses offered by us are all career oriented, skill enhancement courses and these courses are well conceptualised for placement.

We have been able to provide the Hotel/Hospitality/Hospital industry with quality students not only within the Indian borders but offshore too.

Our placement cell serves as an outstanding platform for the students to gain specific skills related to their subject of choice or domain to stay ahead of the competition by providing them with live projects, internships that provides adequate industrial exposure.

It creates an excellent opportunity for the students to become aware of the industry and the real-life workspace. They get to know about preparing and presenting CVs, attending interviews, interacting in group discussions, etc.

Campus placements provide the students with a foot in the door opportunity, enabling them to start off their career right after they have completed their course curriculum. Besides the above, the main reason why college placements are becoming the major criteria for the students for choosing an educational institution is that they ease barriers to employment for graduates, apart from holding considerable value for students, in terms of personal and professional development.

Remember, the first job matters a lot and it should be a prudent step towards building a career. College placements are indeed a not-so-tedious path to establish a career compared to the tough and frustrating job-seeking process in the open job market scenario that is mostly conducted by inviting random walk-ins. Thus more often than not, college placements give a good head start for students in their pursuit of the career.

When students opt for the right educational institution, they can start off their career right from the campus, which otherwise turns out to be a rough path if you happen to choose a wrong institute for this crucial phase of your education. Private colleges and universities spent a lot of resources to develop an efficient placement and training cell.

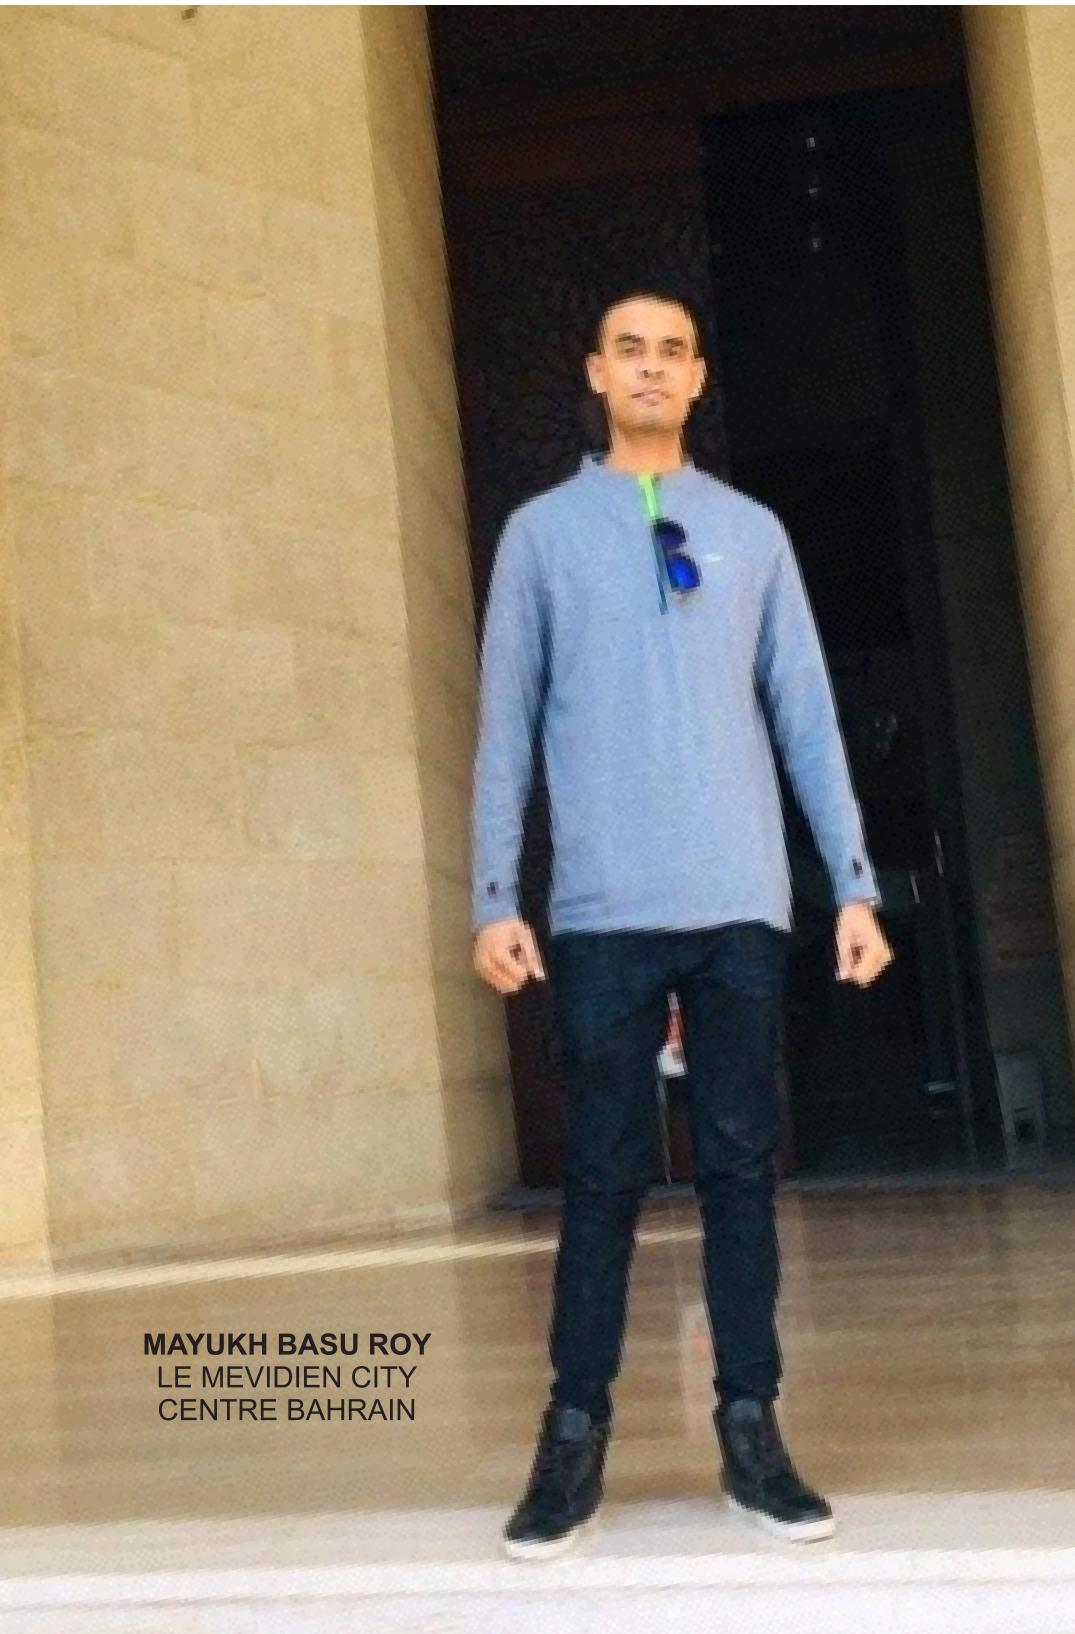

Indian Institution of Hotel Management holds a strong alliance with the industry because of its consistent involvement to provide 100% job assistance to its students. Thus the corporate network and linkage aids to bring fresh talents to the industry that goes for the mutual benefit of the students and the employers.
